Subject: InvestUS Update - June 2015

Dear Investors,

Attached is a letter issued by the current project operators. The content principally covers the matter of capital payments, which as you know under the terms of the original investment are due at the end of the 3 year investment term.

We recently held a meeting with the project operators InvestUS Michigan LLC / Exit Strategy LLC where details of the necessary re-structuring on the operational side of this investment were discussed as was the impact this would have on the performance and exit of the investment itself.

There will be a further communication issued concerning the payment of annual returns, which thankfully have now been progressed towards maintaining an on-time schedule. The matter of capital repayment is covered within the attached letter. Should you have any specific questions can we please ask that these are made in writing and emailed to support@glenmuir.ae

Kind Regards

Kind Regards,
Richard Chamberlain

InvestUS Limited

Dear Investor,

I am writing to you in my capacity as the SPV Director for the Exit Strategy investment model in which you have invested through "InvestUS Limited". I want to take the opportunity to explain something of the last few months activity within the project that will lead to an unfortunate delay in the return of your invested capital.

Your investment was made into the "Exit Strategy" project through the purchase of shares in InvestUS Limited, your investment funds were placed in ESCROW and then utilised to purchase residential property in the USA; that was then to be renovated and sold at a profit to generate the interest return. The project was run and operated by Right Buy Properties LLC (RBP), and Metro Equity LLC operated the ESCROW and the title registration of the properties purchased and sold.

In July 2014 it became apparent that there were failings in the management of the project and this resulted in the Exit Strategy SPV directors taking over the project, dismissing RBP from any active role and taking legal action on your behalf against RBP, Metro Equity Services and some other individuals involved in the project.

This lawsuit is ongoing and to date has been successful in recovery of some assets from RBP as a form of compensation for the failings of the project management.

The main area that RBP failed in was in the renovation and sale of the properties, which affected the whole investment model and the ability of the project to repay Capital.

The management faults we experienced by RBP have been rectified by the SPV Directors, who are now in control of all aspects of the investment and have staff in the USA who run the project day to day under my supervision, However the failings of RBP has put the project back in its performance at least 12 - 18 months.

The project is unable at this stage to return your invested capital equivalent to your share purchase price but intends to maintain interest payments to investors at the rate of 15% per annum for the duration that your capital remains invested.

I propose to report to you quarterly on the progress of the project performance and in 12 months will review the project performance to see if your original capital investment together with the uplift of capital can be achieved.

I apologise for the delay in the return of your invested capital but please understand that this is as a direct result of the failings of the project management company RBP against whom we have raised a lawsuit in the USA.

Kindest Regards

Steve Wright
Exit Strategy SPV Director
